SEED CATALOG

Dear Fellow Farmers,

As owner of an independent seed company, I take pride in the fact that I am only a phone call away from you, the customer. It is important to me that you are satisfied with the products that I provide. Independence allows Tracy Seeds to offer a vast range of genetics and traits. I consider all our customers a part of the Tracy Seeds family and invite you to visit our office anytime.

Josh H. Tracy - Owner/CEO

1805 S. State Road 140
Janesville, WI 53546

OUR MISSION

To provide high quality products and exceptional service at a fair price.

OUR HISTORY

Tracy and Son Farms, Inc started in 1935 near Madison, Wisconsin on 3.5 acres that produced 138 bushel hybrid seed corn. In 1938 Robert Tracy moved his operation to Rock County renting 560 acres. Currently Tracy and Son Farms owns and operates 2,500 acres.

Tracy Seeds resumed seed sales in 2005 and is owned by Robert's grandson Josh Tracy. Josh is the fourth generation in the seed business and is now joined by his son Colin; the fifth generation at Tracy Seeds. We are dedicated to providing our customers with the highest quality of hand selected corn, soybeans, wheat, alfalfa, and oat varieties. Your success is our success and is our main focus, "Let's Grow Together."

Tracy Seeds has transformed from a contract conditioner to marketing the Tracy's brand in seed corn and soybeans. We treat a variety of products; ask us about custom treating and packaging.

"TOUGH GUY CORN"
denotes proven variety

Corn Products

86 - 94 day maturity

Tracy T086-26A Conventional 86 DAYS

Available: Agrisure Artesian® GTA

- » Agrisure Artesian™ technology
- » Outstanding stalk and roots
- » Widely adapted across northern markets West and East
- » Great standability for late harvest

Black Layer GDU's* 2193 | **Plant Height** Medium-Tall | **Ear Flex** Semi-Flex

EARLY GROWTH	4
TEST WEIGHT	3
DRY DOWN	3
DROUGHT TOLERANCE	5
PLANT HEALTH	4

CONVENTIONAL

Rating Scale: 5 = Excellent, 4 = Very Good, 3 = Good

Tracy T089-29 Conventional 89 DAYS

Available: Agrisure® 3010, Agrisure® Above

- » Consistently high-yielding short season hybrid
- » Excellent agronomics, roots, and plant health
- » Versatile hybrid that will handle a variety of soil types
- » Moves well East to West

Black Layer GDU's* 2315 | **Plant Height** Medium-Tall | **Ear Flex** Semi-Determinate

Agrisure Artesian[®] technology maximizes yield when it rains and increases yield when it doesn't. Built for top-end yield using scientifically selected genes, this elite class of high-performing hybrids can respond to water stress with multiple genes at virtually any stage of growth—managing gaps in rainfall throughout the season. Artesian[™] corn hybrids can respond to the unpredictability of weather and improve yield consistency by converting water to grain more efficiently than other hybrids.

The **Agrisure**[®] **GT** trait provides tolerance to in-crop applications of glyphosate based herbicides. This hybrid is an excellent option for refuge acres in a structured refuge operation.

The **Agrisure Artesian**[®] **GTA** trait stack brings together an elite hybrid, which converts water to grain more efficiently than other hybrids, with tolerance to in-crop applications of glyphosate based herbicides—resulting in season-long water optimization, and more consistent production and profit potential. This hybrid is an excellent option for refuge acres in a structured refuge field.

The **Agrisure**[®] **3010** trait stack provides corn borer control with both glyphosate and glufosinate tolerance.

The **Agrisure Artesian**[®] **3011A** trait stack brings together an elite hybrid that maximizes yield when it rains and increases yield when it doesn't with better control of damaging corn insects and herbicide flexibility. The Agrisure Artesian 3011A trait stack provides improved yield consistency by converting water to grain more efficiently than other hybrids, control of corn borer and corn rootworm, and tolerance to both glyphosate and glufosinate based herbicides.

The **Agrisure Viptera**[®] **3110** trait stack offers season-long comprehensive above-ground insect control. It is ideal in areas where corn rootworm management is not a primary concern. Featuring the Agrisure Viptera trait, which is the only trait available today that effectively controls western bean cutworm, the Agrisure Viptera 3110 trait stack controls ear-feeding insects and protects genetic yield potential.

PowerCore[®] trait technology delivers superior control of above-ground insects in corn.

ENLIST[®] WEED CONTROL SYSTEM— PROVEN CONTROL OF TOUGH WEEDS

Enlist Duo[®] and Enlist One[®] herbicides with Colex-D[®] technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on PowerCore[®] Enlist[®] corn crops.

2,4-D choline

Glyphosate

Glufosinate

FOP Herbicides

COLEX-D[®] technology

HERBICIDE

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

COLEX-D[®] technology

HERBICIDE

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty[®] herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

Agrisure[®] Above

The **Agrisure[®] Above** trait stack offers the convenience of an integrated E-Z Refuge[®] seed blend featuring multiple modes of action against corn borer, as well as suppression of ear-feeding insects. The Agrisure[®] Above trait stack is ideal in areas where corn rootworm management is not a primary concern.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Duracade[®]

The **Duracade[®]** trait stack provides multiple modes of action against corn rootworm and corn borer, as well as suppression of ear-feeding insects. This trait stack includes a novel, alternate mode of action to help preserve trait durability and delay insect adaptation for long-term field health, and the convenience of an integrated E-Z Refuge[®] seed blend.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Duracade Viptera[™]

The **DuracadeViptera[™]** trait stack is the industry's most comprehensive solution for proactively protecting yield potential and field health. It has the power traits to control 16 damaging above- and below-ground pests, more than any competitive trait stack, while offering the convenience of an integrated E-Z Refuge[®] seed blend. Its novel, alternate modes of action, including a unique mode of action that demonstrates strong performance against corn rootworm, help preserve trait durability and delay insect adaptation for long-term field health.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Viptera[®]

The **Viptera[®]** trait stack offers the most comprehensive above ground insect control with control of ear-feeding insects, multiple modes of action against key aboveground insects and the convenience of an integrated E-Z Refuge[®] seed blend. It is ideal in areas where corn rootworm management is not a primary concern. Featuring the Viptera[®] trait, which is the only trait available today that effectively controls western bean cutworm, the Viptera[®] trait stack helps protect genetic yield potential.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Viptera[™] Z3

The **Viptera[™] Z3** trait stack offers the most comprehensive above-ground insect control, with three modes of action on key broad lepidopteran pests and three modes of action on corn borer. It reduces the need for scouting and treatments and is a good fit for geographies where corn rootworm is not a concern. Featuring the Viptera[®] trait, which is the only trait available today that effectively controls western bean cutworm, the Viptera[™] Z3 trait stack helps protect genetic yield potential and includes the convenience of an integrated E-Z Refuge[®] seed blend.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Soybean Technology

A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM

2,4-D choline | Glyphosate | Glufosinate

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3® soybeans.

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango® DMA® herbicide, Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

ENLIST E3® (E3) soybeans offer the most advanced trait technology available in soybeans, providing a new standard for weed control and yield performance. With Enlist E3® soybeans, the three herbicide tolerances - 2,4-D choline, glyphosate and glufosinate - combine to deliver a complete system with more weed control options. Using multiple herbicide sites of action in a program approach helps control weeds in the current growing season while limiting the ability for herbicide-resistant weeds to develop. Enlist E3® soybeans give farmers the flexibility to employ multiple herbicide sites of action.

Alfalfa Products

TSA 200

- » Medium recovery after harvest
- » Great for economic production
- » Better for 3 or 4 cuttings per year
- » Used for short rotations
- » Keep on well-drained soils

Fall Dormancy 3.0-4.0

Winter Hardiness 2.0

Persistence Average

Disease Rating (WI) 26/30

Cutting Recovery Average

TSA 230-PLH

- » First choice where Potato Leafhopper is a pest or not sprayed
- » Eliminates need to spray for Potato Leafhopper
- » Naturally high forage quality potential
- » Manage for 3 or 4 cuttings per year
- » Medium rotation cycle

Fall Dormancy 4.0

Winter Hardiness 2.0

Persistence Very Good

Disease Rating (WI) 30/30

Cutting Recovery Fast

TSA 250-ML

- » High yield, high quality, multi-leaf
- » Adapted for 3, 4, or 5 cuttings per year
- » Selected for good forage quality, yield, and persistence potential
- » Medium to long rotation cycle

Fall Dormancy 4.0

Winter Hardiness 2.0

Persistence Superior

Disease Rating (WI) 30/30

Cutting Recovery Very Fast

TSA 280-APH2

- » First choice where Aphanomyces Race 2 is a problem
- » Elite performance for yield potential, quality, and persistence
- » Widely adapted to soils and geography
- » Manage for 3, 4, or 5 cuttings per year

Fall Dormancy 4.0

Winter Hardiness 2.0

Persistence Superior

Disease Rating (WI) 30/30

Cutting Recovery Very Fast

Alforex Hi-Gest® 360

- » High yield potential with improved fiber digestibility
- » Better quality for top performing dairies; 3 or 4+ cuttings per year
- » Conventional bred plant offering wider harvest window and improved performance
- » Very leafy, medium to fine stems while maintaining solid standability

Fall Dormancy	3.0
Winter Hardiness	1.5
Persistence	Excellent
Disease Rating (WI)	35/35
Cutting Recovery	Average

Alforex Hi-Gest® 460

- » High yield alfalfa bred for improved yield and forage quality
- » Better quality for top performing dairies; 3, 4, or 5 cuttings per year
- » Adapted for aggressive, high quality production or more relaxed high yield practices
- » Strong leaf disease package which contributes to a high leaf-to-stem ratio and higher crude protein

Fall Dormancy	4.0
Winter Hardiness	1.5
Persistence	Excellent
Disease Rating (WI)	34/35
Cutting Recovery	Fast

We have most of the common forage grasses, clovers, and mixes available.

BIOLOGICAL OFFERINGS

Tracy Seeds is proud to offer an elite line-up of YieldMaster Solutions biological products proven to promote overall plant health and increase ROI.

envita

FOR USE ON

Corn | Soybeans | Wheat
Alfalfa | Sugar Beets
Potatoes | Canola | Cotton
& More

KEY BENEFITS

- N-fixing bacteria that works within the plant all season long!
- Works throughout the entire plant to supplement Nitrogen where & when its needed.
- Easy to tank mix and apply in-furrow or foliar.

In-Furrow | Foliar

Nutriquire

FOR USE ON

Corn | Soybeans | Wheat
Alfalfa | Sugar Beets
Potatoes | Canola | Cotton
& More

KEY BENEFITS

- Enhances fertilizer by increasing plant nutrient uptake
- Improves availability of phosphorus and potassium
- Aids in unlocking nutrient tie-up caused by high or low pH soils

In-Furrow | Foliar | UAN

IONfx

FOR USE ON

Corn | Silage Corn
Sorghum | Cotton
Canola | Flax

KEY BENEFITS

- Heat & drought stress mitigation
- Plant growth regulator response
- Increased ear size and improved ear fill

Seed Coat | In-Furrow | Foliar

Soyfx

FOR USE ON

Soybeans

KEY BENEFITS

- More branching per plant
- Increase in flowers and pods
- Increased nodulation

Seed Coat | In-Furrow | Foliar

FOR USE ON

Soybeans | Corn

KEY BENEFITS

- 8-20% yield increases
- Improved pest resistance
- Improved nutrient and water uptake

Planter Box

To put biologicals to work on your acres contact your Tracy Seeds representative today!

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides. Agrisure®, Agrisure Artesian® and Agrisure Viptera®, Agrisure® Above, Agrisure® Total, Artesian®, Duracade®, DuracadeViptera™, DuracadeViptera™ Z3, Viptera™, Viptera™ Z3, and Refuge Renew™ are trademarks of a Syngenta Group Company.

More information about Duracade® is available at www.biotradestatus.com.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience, LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience, LLC.

YieldGard **VT PRO** YieldGard VT Pro® is a registered trademark used under license from the Bayer Group.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of these seed traits include a limited license to produce a single crop in the United States. The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance Corteva Agrisciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

IRM - Properly managing trait technology is key to preserving it as a long-term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship

requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Enlist Duo® and Enlist One® herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions. Enlist E3® soybeans were jointly developed by Corteva Agriscience and MS Technologies, LLC.™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Corteva Agriscience. PowerCore® multi-event technology developed by Corteva Agriscience and Monsanto. Roundup®, Roundup Ready®, Roundup Ready 2 Technology and Design, and PowerCore® are registered trademarks of Monsanto Technology LLC. Liberty®, LibertyLink® and the Water Droplet Design® are registered trademarks of BASF. Enlist®, Colex-D®, and Refuge Advanced® are trademarks of Corteva Agriscience and its affiliated companies. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

PWE – PowerCore® Enlist® corn products with HX1, VTP, ENL, LL, RR. A separate 5% corn borer refuge in the corn belt, and a separate 20% corn borer refuge in EPA-designated cotton-growing counties must be planted PowerCore Enlist products.

Serving Farmers Needs Since 1935
