# Dear Fellow Farmers,

As owner of an independent seed company I take pride in the fact that I am only a phone call away from you, the customer. It is important to me that you are satisfied with the products that I provide. Independence allows Tracy Seeds to offer a vast range of genetics and traits. I consider all of our customers a part of the Tracy Seeds family and invite you to visit our office anytime.

Josh H. Tracy - Owner/CEO

## Our History

Tracy and Son Farms, Inc started in 1935 near Madison, Wisconsin on 3.5 acres that produced 138 bushel hybrid seed corn. In 1938 Robert Tracy moved his operation to Rock County renting 560 acres. Currently Tracy and Son Farms own over 2,300 acres and farms over 3,000 acres.

Tracy Seeds resumed seed sales in 2005 and is owned by Robert's grandson Josh Tracy. We are dedicated to providing our customers with the highest quality of hand selected corn, soybeans, wheat, alfalfa and oat varieties. Your success is our success and is our main focus, "Let's Grow Together."

Tracy Seeds has transformed from a contract conditioner to marketing the Tracy's brand in seed corn and soybeans. We treat a variety of products; ask us about custom treating and packaging.

## Our Mission

To provide high quality products and exceptional service at a fair price.

"Tough Guy Corn" denotes proven variety

## Elite Silage Hybrids

	RM	PAGE
T086-13	85	4
T095-29	95	6
T098-11	98	6
T104-13	104	7
T108-29	108	8
T109-31	109	9
T110-28	110	9

These recommended hybrids have outperformed others in terms of feed quality and tonnage when used as corn silage. Other hybrids in our lineup are also good for silage, but these have shown the best performance.

Modern farming demands modern seed. Modern seed production demands latest transportation and extensive research. Tracy "a great name in seed since 1937" utilizes the very latest techniques to back our slogan "Tracy's seed corn will suit you to a "T."

# Corn Technologies

	<p><b>Agrisure Artesian®</b> technology maximizes yield when it rains and increases yield when it doesn't. Built for top-end yield using scientifically selected genes, this elite class of high-performing hybrids can respond to water stress with multiple genes at virtually any stage of growth—managing gaps in rainfall throughout the season. Artesian™ corn hybrids can respond to the unpredictability of weather and improve yield consistency by converting water to grain more efficiently than other hybrids.</p>
	<p>The <b>Agrisure® GT</b> trait provides tolerance to in-crop applications of glyphosate-based herbicides. This hybrid is an excellent option for refuge acres in a structured refuge operation.</p>
	<p>The <b>Agrisure Artesian® GTA</b> trait stack brings together an elite hybrid, which converts water to grain more efficiently than other hybrids, with tolerance to in-crop applications of glyphosate-based herbicides—resulting in season-long water optimization, and more consistent production and profit potential. This hybrid is an excellent option for refuge acres in a structured refuge field.</p>
	<p>The <b>Agrisure® 3000GT</b> trait stack offers control of corn borer and corn rootworm, as well as herbicide flexibility with both glyphosate and glufosinate tolerance.</p>
	<p>The <b>Agrisure® 3010</b> trait stack provides season-long control of corn borer, as well as herbicide flexibility with both glyphosate and glufosinate tolerance.</p>
	<p>The <b>Agrisure Artesian® 3011A</b> trait stack brings together an elite hybrid that maximizes yield when it rains and increases yield when it doesn't with better control of damaging corn insects and herbicide flexibility. The Agrisure Artesian 3011A trait stack provides improved yield consistency by converting water to grain more efficiently than other hybrids, control of corn borer and corn rootworm, and tolerance to both glyphosate and glufosinate based herbicides.</p>
	<p>The <b>Agrisure Viptera® 3110</b> trait stack offers season-long comprehensive above-ground insect control. It is ideal in areas where corn rootworm management is not a primary concern. Featuring the Agrisure Viptera trait, which is the only trait available today that effectively controls western bean cutworm, the Agrisure Viptera 3110 trait stack controls ear-feeding insects and protects genetic yield potential.</p>
	<p>The <b>Agrisure Viptera® 3110A</b> trait stack combines an Agrisure Artesian® hybrid that converts water to grain more efficiently than other hybrids with season-long comprehensive above-ground insect control. It is ideal where corn rootworm management is not a primary concern. Featuring the Agrisure Viptera trait, which is the only trait available today that effectively controls western bean cutworm, the Agrisure Viptera 3110A trait stack controls ear-feeding insects and protects genetic yield potential.</p>
	<p>The <b>Agrisure Viptera® 3111</b> trait stack offers control of above- and below-ground insects, reducing insect feeding damage. Featuring the Agrisure Viptera trait, which offers the most comprehensive above-ground insect control, including control of ear-feeding insects and effective control of western bean cutworm, the Agrisure Viptera 3111 trait stack protects genetic yield potential.</p>
	<p>The <b>Agrisure® 3120 E-Z Refuge®</b> trait stack offers the convenience of an integrated E-Z Refuge® seed blend featuring multiple modes of action against corn borer, as well as suppression of ear-feeding insects. The Agrisure 3120 E-Z Refuge trait stack is ideal in areas where corn rootworm management is not a primary concern.</p> <p><b>Important:</b> Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.</p>

The **Agrisure Artesian® 3120A E-Z Refuge®** trait stack brings together an elite hybrid, which maximizes yield when it rains and increases yield when it doesn't, with the convenience of an integrated E-Z Refuge seed blend product that provides control of corn borer. The Agrisure Artesian 3120A E-Z Refuge trait stack improves yield consistency and yield potential by converting water to grain more efficiently than other hybrids, and features two modes of action against corn borer, as well as suppression of ear-feeding insects.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure® 3122 E-Z Refuge®** trait stack offers the convenience of an E-Z Refuge® seed blend featuring two modes of action against corn borer and corn rootworm, as well as suppression of ear-feeding insects. The Agrisure 3122 E-Z Refuge trait stack is a good addition to a multi-year corn rootworm management plan.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure Artesian® 3122A E-Z Refuge®** trait stack brings together an elite hybrid, which maximizes yield when it rains and increases yield when it doesn't, with the convenience of an integrated E-Z Refuge seed blend and above- and below-ground corn insect control. The Agrisure Artesian 3122A E-Z Refuge trait stack provides improved yield consistency by converting water to grain more efficiently than other hybrids, multiple modes of action against corn borer and corn rootworm and suppression of ear-feeding insects.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure Viptera® 3220 E-Z Refuge®** trait stack offers the most comprehensive above-ground insect control with control of ear-feeding insects, multiple modes of action against key above-ground insects and the convenience of an integrated E-Z Refuge® seed blend. It is ideal in areas where corn rootworm management is not a primary concern. Featuring the Agrisure Viptera trait, which is the only trait available today that effectively controls western bean cutworm, the Agrisure Viptera 3220 E-Z Refuge trait stack protects genetic yield potential.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure Viptera® 3220A E-Z Refuge®** trait stack combines an Agrisure Artesian® hybrid that converts water to grain more efficiently than other hybrids with the most comprehensive above-ground insect control and the convenience of an integrated E-Z Refuge® seed blend. It is intended for areas where corn rootworm management is not a primary concern. Featuring the Agrisure Viptera trait, which controls ear-feeding insects and is the only trait available today that effectively controls western bean cutworm, the Agrisure Viptera 3220A E-Z Refuge trait stack protects genetic yield potential.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure Duracade® 5122 E-Z Refuge®** trait stack provides multiple modes of action against corn rootworm and corn borer, as well as suppression of ear-feeding insects. This trait stack features the Agrisure Duracade trait, a unique mode of action that controls corn rootworm differently than other products on the market, and the convenience of an integrated E-Z Refuge seed blend.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

The **Agrisure Duracade® 5122A E-Z Refuge®** trait stack combines a hybrid that optimizes the conversion of water to grain, with two modes of action for control of corn rootworm and corn borer, as well as suppression of ear-feeding insects, and the convenience of an integrated E-Z Refuge seed blend. Featuring a unique mode of action that controls corn rootworm differently than other traits on the market, this trait stack provides effective control of corn rootworm, allowing the crop to reach its genetic yield potential.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.**

# Soybean Technologies

GLYPHOSATE  
TOLERANT

Glyphosate Tolerant Soybean

LIBERTYLINK®

GT27

**LibertyLink® GT27®** Created with high-yielding elite genetics, LibertyLink® GT27® soybeans gives growers exceptional performance coupled with outstanding weed control. LibertyLink GT27 soybeans are the first soybean technology enabling both Liberty® and glyphosate use over the top. And now, in select counties in certain states, Alite 27 herbicide adds another effective pre-emergent residual mode of action to the LibertyLink GT27 system. It is the first HPPD herbicide available for soybeans.

Enlist E3  
SOYBEANS

**Enlist E3® soybeans** provide tolerance to new 2,4-D choline, glyphosate and glufosinate.

™/®Trademarks of Dow AgroSciences or DuPont, and their affiliated companies or their respective owners. Enlist E3 soybeans were jointly developed by Dow AgroSciences and M.S. Technologies, L.L.C.

## The Enlist™ System - Get Control of Tough Weeds

- New 2,4-D Choline
- Glyphosate
- Glufosinate

Following burndown, Enlist Duo® and Enlist One® with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3™ soybeans.

- Convenient blend of 2,4-D choline and glyphosate
- Two modes of action to deliver control and help prevent resistance in your fields

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Ability to tank-mix with Liberty® herbicide and other qualified herbicides, customizing the ratio of herbicides to match each farm's needs

### On-Target Applications

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

## Alforex Hi-Gest® 360

- » High yield potential with improved fiber digestibility
- » Better quality for top performing dairies; 3 or 4+ cuttings per year
- » Conventional bred plant offering wider harvest window and improved performance
- » Very leafy, medium to fine stems while maintaining solid standability

Fall Dormancy 3.0

Winter Hardiness 1.5

Persistence Excellent

Disease Rating (WI) 35/35

Cutting Recovery Average

## Alforex Hi-Gest® 460

- » High yield alfalfa bred for improved yield and forage quality
- » Better quality for top performing dairies; 3, 4, or 5 cuttings per year
- » Adapted for aggressive, high quality production or more relaxed high yield practices
- » Strong leaf disease package which contributes to a high leaf-to-stem ratio and higher crude protein

Fall Dormancy 4.0

Winter Hardiness 1.5

Persistence Excellent

Disease Rating (WI) 34/35

Cutting Recovery Fast

*“Feed tests are better with higher protein reducing our input costs while allowing for an advantage on our cutting window.”*

- Don, Kevin and Ryan Hildebrandt

# Forage Seeds

We have most of the common forage grasses, clovers, and mixes available. Please contact us for prices and availability.

## COMMON FORAGES AVAILABLE:

*Barley*

---

*Bromegrass*

---

*Climax Timothy*

---

*Dwarf Grain Sorghum*

---

*Oats*

---

*Orchardgrass*

---

*Pea & Oat Mixes*

---

*Sorghum Sudangrass*

---

*Tillage Radish*

---

*Wheat and more...*

*\* Payment due at time of special order and product is non-returnable.*

## JOHN DEERE FINANCIAL

**John Deere Financial** is a dependable, convenient source of financing for rural America. Preferred multi-use account customers enjoy

- flexible credit terms
- competitive interest rates
- dependable credit source
- one monthly statement for all purchases
- no annual fee
- no card to carry
- incentives with our special terms programs
- early pay discounts not applicable

PURCHASE BY	INTEREST RATE
Sept. 1, 2020 — Jan. 10, 2021	0% fixed, due in full Dec. 2021
Jan. 11, 2021 — Mar. 31, 2021	2.9% fixed, due in full Dec. 2021
Apr. 1, 2021 — May 31, 2021	4.9% fixed, due in full Dec. 2021

### JOHN DEERE FINANCIAL PROGRAM TERMS

**PREFERRED** multi-use account customers of John Deere Financial can qualify for fixed 0%, 2.9%, 4.9% for seed purchases of \$2,500 or more from September 1, 2020 to May 31, 2021 with no payment until December 2021.

**INTEREST** starts on day of purchase.

**FULL** balance plus interest due in December 2021.

**AT** no time shall the customer finance rate (interest rate) be less than 0% APR. Variable interest rates are based on Citibank Prime.

**PURCHASE** subject to John Deere Financial approval.

**TRACY SEEDS** can help you apply to John Deere Financial if you are not an account holder.

EQUAL OPPORTUNITY LENDER

Subject to the terms and conditions of the John Deere Financial Credit Agreement and John Deere Financial credit approval.

### TRACY SEEDS IN-HOUSE FINANCING

Minimum order \$2,500

20% down

Take advantage of cash discounts less 5%

Orders must be placed by May 15, 2021

Late payment may revert your purchase price to full retail based on total original order placed

Must fill out in-house financing agreement and offer will take effect when approved by Tracy Seeds credit department

### EARLY PAY DISCOUNT

PAY BY	CASH DISCOUNT	IN-HOUSE DISCOUNT
August 31, 2020	14%	9%
September 30, 2020	12%	7%
October 31, 2020	11%	6%
November 30, 2020	10%	5%
December 31, 2020	9%	4%

Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to [www.corteva.us/Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html) to download the latest Corteva Agriscience Corn Product Use Guide.

**Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.** Agrisure®, Agrisure Artesian®, Agrisure Duracade®, Agrisure Viptera®, Artesian™ and E-Z Refuge® are trademarks of a Syngenta Group Company.

More information about Agrisure Duracade® is available at [www.biotradestatus.com](http://www.biotradestatus.com).

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Agrisure® Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, Inc. Herculex® Technology incorporated into these seeds is commercialized under license from Dow AgroSciences LLC. HERCULEX® and the HERCULEX Shield are trademarks of Dow AgroSciences LLC.

**Important: Always read and follow label instructions. Some products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status.**

Seeds containing the LibertyLink® trait may be protected under one or more U.S. patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a BASF Grower Technology Agreement. It is illegal to save seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

LibertyLink® GT27® soybeans offer triple stack tolerance to Liberty, glyphosate, and, in select counties specified on the label, the first HPPD based herbicide for soybeans—Alite™ 27. Other HPPD herbicides not labeled for use with LibertyLink GT27 or isoxaflutole-resistant soybeans may cause significant crop injury. Alite 27 herbicide is only available for use in labeled counties.

Always read and follow label directions. Alite 27 is a restricted use herbicide. Alite, Liberty, and LibertyLink are registered trademarks of BASF. GT27 is a registered trademark of M.S. Technologies, L.L.C. MS Technologies is a trademark of M.S. Technologies, L.L.C. ©2020 BASF Corporation / M.S. Technologies, L.L.C. All Rights Reserved. APN 20-INT-0014

LibertyLink GT27 is not tolerant to all HPPD herbicides. Alite™27 herbicide from BASF is the first HPPD herbicide for use on GT27 and LibertyLink GT27 soybeans is currently available in select counties in certain states.

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein ([www.corteva.us/Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html)). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist® crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: [www.corteva.us/Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html).

Dow AgroSciences is a member of Excellence Through Stewardship® (ETS). Dow AgroSciences products are commercialized in accordance with ETS product launch stewardship guidance and Dow AgroSciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: [www.biotradestatus.com](http://www.biotradestatus.com).

The transgenic soybeans event in Enlist E3® soybeans is jointly developed and owned by Dow AgroSciences LLC and M.S. Technologies, L.L.C. ®™Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of The Dow Chemical Company ("Dow") or an affiliated company of Dow. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

John Deere's green and yellow color scheme, the leaping deer symbol, and John Deere are trademarks of Deere & Company.
